

## Static Portfolios

Unlike the Year of Enrollment Portfolios, Static Portfolios are not automatically reallocated to more conservative investments as the Beneficiary ages. Instead, Static Portfolio investments remain fixed, subject to periodic rebalancing back to the Portfolio guidelines and to any change by the Committee in the Portfolio investment guidelines.

If you choose to invest in Static Portfolios that invest in Underlying Funds with a significant weighting in stocks, such as the Growth Portfolio and the Moderate Growth Portfolio, you should consider moving your assets to the more conservative Static Portfolios that invest more heavily in bond Funds and/or the Money Market Fund as your Beneficiary approaches college age. Please note that there are limitations on your ability to move assets from one Portfolio to another. (Please see *Maintaining My Account* in the Program Details Booklet)

The Static Portfolios consist of the following seven (7) Portfolios, each of which invest in multiple Underlying Funds as shown in the table on the next page.

## Static Asset Class Allocations

# Static Portfolio Profiles

The following profiles highlight the investment objective, strategy, and a summary of the main risks of each Portfolio. The Portfolios in DreamAhead are more likely to meet their goals if each Underlying Fund in which each Portfolio invests achieves its stated investment objectives.

As with any investment, your investment in the Portfolios could lose money or the Portfolios' performance could trail that of other investments. Each Portfolio has a different level of risk. Each Underlying Investment's current prospectus and statement of additional information contains information not summarized here and identifies additional risks that are not discussed below.

The Funds comprising a Portfolio and/or percentages of each Fund included in a Portfolio may change at any time without notice. The sponsors of the Underlying Funds have no legal obligation to provide financial support for their Funds, and you should not expect that a sponsor will provide financial support to a Fund at any time. You may wish to speak to an investment advisor to understand the specific risks associated with each Portfolio. A discussion of the risk factors relating to each Portfolio and Underlying Funds can be found in the Program Details Booklet.

## Cash Preservation Portfolio

### **Objective:**

This Portfolio seeks to provide current income while maintaining liquidity. This Portfolio is designed for investors with a very low tolerance for short-term market fluctuations who want very low risk to principal and have a desire for current income.

### **Strategy:**

This Portfolio is exclusively invested in the Vanguard Cash Reserves Federal Money Market Fund Admiral Shares. The Fund invests primarily in high-quality, short-term money market instruments. Under normal circumstances, at least 80% of the fund's assets are invested in securities issued by the U.S. government and its agencies and instrumentalities, including repurchase agreements that are collateralized solely by U.S. government securities or cash. Although these securities are high-quality, some of the securities held by the fund are neither guaranteed by the U.S. Treasury nor supported by the full faith and credit of the U.S. government.

To be considered high quality, a security must be determined by Vanguard to present minimal credit risk based in part on a consideration of maturity, portfolio diversification, portfolio liquidity, and credit quality. The fund invests more than 25% of its assets in securities issued by companies in the financial services industry, which includes, without limitation, securities issued by certain government-sponsored enterprises. The fund maintains a dollar-weighted average maturity of 60 days or less and a dollar-weighted average life of 120 days or less.

Government money market funds are required to invest at least 99.5% of their total assets in cash, U.S. government securities, and/or repurchase agreements that are collateralized solely by U.S. government securities or cash (collectively, government securities). The fund generally invests 100% of its assets in U.S. government securities and therefore will satisfy the 99.5% requirement for designation as a government money market fund.

**Risks:**

The Portfolio primarily may be subject to the following risks:

The Portfolio is designed for investors with a low tolerance for risk; however, the Portfolio is subject to the following risks, which could affect the Portfolio's performance: Income Risk; Manager Risk; Credit Risk; and Industry Concentration Risk.

## **Income Portfolio**

**Objective:**

The Income Portfolio seeks to provide investors limited capital appreciation with minimal risk to principal. The Portfolio is designed for investors with a very low tolerance for short-term market fluctuations who want low risk to principal and have a high desire for current income with limited capital appreciation. The Portfolio investments include a mix of fixed income investments with a significant cash (Money Market Fund) position.

**Strategy:**

The Portfolio currently invests in the following Funds: Fidelity® U.S. Bond Index Fund, Fidelity® Long-Term Treasury Bond Index Fund, Vanguard Total Bond Market Index Fund Institutional Plus Shares, Schwab® Treasury Inflation Protected Securities Index Fund, Vanguard Emerging Markets Bond Fund Admiral Shares, and Vanguard Cash Reserves Federal Money Market Fund Admiral Shares.

The Portfolio's main goal is to provide income by investing in broadly diversified fixed income Funds and the Money Market Fund. The Portfolio's Underlying Funds primarily include a wide spectrum of public, investment-grade, taxable, fixed income securities issued in the U.S. to provide potential income through interest payments. The Money Market Fund may add stability to the Portfolio by investing in cash equivalents, like U.S. Treasury bills, certificates of deposit and money market instruments. Also included in the Portfolio are smaller positions in TIPS, U.S. dollar-denominated bonds issued by governments and government-related issuers in emerging market countries, and investments in debt issued by the U.S. Treasury (not including inflation-protected bonds) and U.S. government agencies, as well as corporate or dollar-denominated foreign debt guaranteed by the U.S. government, with maturities greater than 10 years.

**Risks:**

The Portfolio primarily may be subject to the following risks:

- The Portfolio is primarily subject to low to moderate levels of Interest Rate Risk, Credit Risk, Income Risk, Call Risk, Prepayment Risk, and Extension Risk due to its investments in bond Funds. The Portfolio also has a moderate level of Income Fluctuation Risk, low to moderate levels of Country/Regional Risk, Currency Hedging Risk, Non-diversification Risk, and low levels of Manager Risk, Index Sampling Risk and Derivatives Risk.

## Income & Growth Portfolio

### Objective:

The Income and Growth Portfolio seeks to conservatively grow the Portfolio with modest income at higher risk. The Portfolio is designed for investors with a moderate tolerance for short-term market fluctuations who expect moderate capital appreciation and have a modest desire for income. The Portfolio investments include exposure to a mix of bonds with a blend of globally diversified equity securities.

### Strategy:

Fidelity® Total Market Index Fund, Schwab Total Stock Market Index Fund®, Fidelity® International Index Fund, Fidelity® Emerging Markets Index Fund, Fidelity® U.S. Bond Index Fund, Fidelity® Long-Term Treasury Bond Index Fund, Vanguard Total Bond Market Index Fund Institutional Plus Shares, Schwab® Treasury Inflation Protected Securities Index Fund, Vanguard Emerging Markets Bond Fund Admiral Shares, and Vanguard Cash Reserves Federal Money Market Fund Admiral Shares; resulting in an allocation of 40% of its assets to stocks, 59% to fixed income assets and 1% to the Money Market Fund.

The Portfolio's Underlying Funds primarily include a wide spectrum of public, investment-grade, taxable, fixed income securities issued in the U.S. to provide potential income through interest payments. The short-term Money Market Fund may add stability to the Portfolio by investing in cash equivalents, like U.S. Treasury bills, certificates of deposit and money market instruments. Also included in the Portfolio are smaller positions in TIPS, U.S. dollar-denominated bonds issued by governments and government-related issuers in emerging market countries, and investments in debt issued by the U.S. Treasury (not including inflation-protected bonds) and U.S. government agencies, as well as corporate or dollar-denominated foreign debt guaranteed by the U.S. government, with maturities greater than 10 years.

The stock investments in the Portfolio consist of indirect investments mostly in large-capitalization U.S. stocks and, to a lesser extent, mid-, small-, and micro-capitalization U.S. stocks; and international stocks.

**Risks:**

The Portfolio primarily may be subject to the following risks:

- Because it invests mainly in bond Funds, the Portfolio is primarily subject to low to moderate levels of Interest Rate Risk, Credit Risk, Income Risk, Call Risk, Prepayment Risk and Extension Risk. Through its stock Fund holdings, the Portfolio has a low to moderate level of Stock Market Risk.
- The Portfolio also has low to moderate levels of Country/Regional Risk, Currency Risk, Emerging Markets Risk, Currency Hedging Risk, Non-diversification Risk, Index Sampling Risk and Derivatives Risk.

## Balanced Portfolio

**Objective:**

The Balanced Portfolio seeks to provide a balanced mix of steady return and growth but comes with additional risk. The Portfolio is designed for investors with a modest tolerance for short-term market fluctuations and a desire for income and moderate capital appreciation. The Portfolio investments include a balanced mix of bonds and globally diversified equity securities.

**Strategy:**

The Portfolio currently invests in the following Funds: Fidelity® Total Market Index Fund, Schwab Total Stock Market Index Fund®, Fidelity® International Index Fund, Fidelity® Emerging Markets Index Fund, Fidelity® U.S. Bond Index Fund, Fidelity® Long-Term Treasury Bond Index Fund, Vanguard Total Bond Market Index Fund Institutional Plus Shares, Schwab® Treasury Inflation Protected Securities Index Fund, Vanguard Emerging Markets Bond Fund Admiral Shares, and Vanguard Cash Reserves Federal Money Market Fund Admiral Shares; resulting in an allocation of 50% of its assets in stocks, 49% in fixed income assets and 1% in the Money Market Fund.

The Portfolio's Underlying Funds primarily include a wide spectrum of public, investment-grade, taxable, fixed income securities issued in the U.S. to provide potential income through interest payments. The Money Market Fund may add stability to the Portfolio by investing in cash equivalents, like U.S. Treasury bills, certificates of deposit and money market instruments. Also included in the Portfolio are smaller positions in TIPS, U.S. dollar-denominated bonds issued by governments and government-related issuers in emerging market countries, and investments in debt issued by the U.S. Treasury (not including inflation-protected bonds) and U.S. government agencies, as well as corporate or dollar-denominated foreign debt guaranteed by the U.S. government, with maturities greater than 10 years.

The stock investments in the Portfolio consist of indirect investments in mostly large-capitalization U.S. stocks and, to a lesser extent, mid-, small-, and micro-capitalization U.S. stocks; and international stocks.

**Risks:**

The Portfolio primarily may be subject to the following risks:

- Because half of the Portfolio is invested in bond Funds, the Portfolio is primarily subject to low to moderate levels of Interest Rate Risk, Credit Risk, Income Risk, Call Risk, Prepayment Risk, and Extension Risk. Through its stock Fund holdings, the Portfolio has moderate level of Stock Market Risk.
- The Portfolio also has low to moderate levels of Country/Regional Risk, Currency Risk, Emerging Markets Risk, Currency Hedging Risk, Non-diversification Risk, Index Sampling Risk and Derivatives Risk.

## Conservative Growth Portfolio

**Objective:**

The Conservative Growth Portfolio seeks to grow the Portfolio moderately with low income but comes with increasing degree of risk. The Portfolio is designed for investors with a moderately high tolerance for short-term market fluctuations who expect significant capital appreciation and have a minimal desire for current income. The Portfolio investments include a blend of globally diversified equity securities with exposure to a mix of bonds.

**Strategy:**

The Portfolio currently invests in the following Funds: Fidelity® Total Market Index Fund, Schwab Total Stock Market Index Fund®, Fidelity® International Index Fund, Fidelity® Emerging Markets Index Fund, Fidelity® U.S. Bond Index Fund, Fidelity® Long-Term Treasury Bond Index Fund, Vanguard Total Bond Market Index Fund Institutional Plus Shares, Schwab® Treasury Inflation Protected Securities Index Fund, Vanguard Emerging Markets Bond Fund Admiral Shares, and Vanguard Cash Reserves Federal Money Market Fund Admiral Shares; resulting in an allocation of 60% of its assets in stocks, 39% in fixed income assets and 1% in the Money Market Fund.

The stock investments in the Portfolio consist of indirect investments mostly in large-capitalization U.S. stocks and, to a lesser extent, mid-, small-, and micro-capitalization U.S. stocks; and international stocks.

**Risks:**

The Portfolio primarily may be subject to the following risks:

- Because it invests in stock Funds, the Portfolio is subject to Stock Market Risk. The Portfolio is also subject to high levels of Country/Regional Risk, Currency Risk, and Emerging Markets Risk. The Portfolio also has low levels of Investment Style Risk, Index Sampling Risk and Derivatives Risk.
- Because it invests in bond Funds, the Portfolio is primarily subject to low to moderate levels of Interest Rate Risk, Credit Risk, Income Risk, Call Risk, Prepayment Risk, and Extension Risk. The Portfolio also has low to moderate levels of Country/Regional Risk, Currency Risk, Emerging Markets Risk, Currency Hedging Risk, Non-Diversification Risk, Index Sampling Risk and Derivatives Risk.

## Moderate Growth Portfolio

**Objective:**

The Moderate Growth Portfolio seeks capital appreciation but comes with high degree of risk. The Portfolio is designed for investors with a high tolerance for short-term equity market fluctuations who expect capital appreciation and have low desire for income. The Portfolio investments are generally a blend of globally diversified equity securities.

**Strategy:**

The Portfolio currently invests in the following Funds: Fidelity® Total Market Index Fund, Schwab Total Stock Market Index Fund®, Fidelity® International Index Fund, Fidelity® Emerging Markets Index Fund, Fidelity® U.S. Bond Index Fund, Fidelity® Long-Term Treasury Bond Index Fund, Vanguard Total Bond Market Index Fund Institutional Plus Shares, Schwab® Treasury Inflation Protected Securities Index Fund, Vanguard Emerging Markets Bond Fund Admiral Shares, and Vanguard Cash Reserves Federal Money Market Fund Admiral Shares, resulting in an allocation of 80% of its assets in stocks, 19% in fixed income assets, and 1% in the Money Market Fund.

The stock investments in the Portfolio consist of indirect investments mostly in large-capitalization U.S. stocks and, to a lesser extent, mid-, small-, and micro-capitalization U.S. stocks; and international stocks.

**Risks:**

The Portfolio primarily may be subject to the following risks:

- Because it invests mostly in stock Funds, the Portfolio is primarily subject to high levels of Stock Market Risk. The Portfolio is also subject to high levels of Country/Regional Risk, Currency Risk, and Emerging Markets Risk. The Portfolio also has low levels of Investment Style Risk, Index Sampling Risk, and Derivatives Risk.
- Because it invests in bond Funds, the Portfolio is primarily subject to low to moderate levels of Interest Rate Risk, Credit Risk, Income Risk, Call Risk, Prepayment Risk, and Extension Risk. The Portfolio also has low to moderate levels of Country/Regional Risk, Currency Risk, Emerging Markets Risk, Currency Hedging Risk, Non-Diversification Risk, Index Sampling Risk and Derivatives Risk.

## Growth Portfolio

**Objective:**

The Growth Portfolio seeks to maximize growth but comes with the highest degree of risk. The Portfolio is designed for investors with a very high tolerance for short-term equity market fluctuations who expect maximum capital appreciation and have no desire for income. The Portfolio investments are generally a blend of globally diversified equity securities.

**Strategy:**

The Portfolio currently invests in the following Funds: Fidelity® Total Market Index Fund, Schwab Total Stock Market Index Fund®, Fidelity® International Index Fund, Fidelity® Emerging Markets Index Fund, and Vanguard Cash Reserves Federal Money Market Fund Admiral Shares, resulting in an allocation of 99% of its assets in stocks and 1% in the Money Market Fund.

The stock investments in the Portfolio consist of indirect investments in mostly large-capitalization U.S. stocks and, to a lesser extent, mid-, small-, and micro-capitalization U.S. stocks; and international stocks.

**Risks:**

The portfolio primarily may be subject to the following risks:

- Because it invests nearly all assets in stock Funds, the Portfolio is primarily subject to high levels of Stock Market Risk. The Portfolio is also subject to high levels of Country/Regional Risk, Currency Risk, and Emerging Markets Risk. The Portfolio also has low levels of Investment Style Risk, Index Sampling Risk, and Derivatives Risk.

# Static Portfolio Fee Structure Tables

The following table shows total Fees charged to each Static Portfolio in DreamAhead. The Underlying Fund Fee, Service Fee and State Administrative Fee added together equal the Total Annual Asset-Based Fee.

## Static Portfolios

Portfolio Name	Annual Asset-Based Fees			Total Annual Asset-Based Fee <sup>4</sup>	Additional Expenses Annual Account Maintenance Fee <sup>5</sup>
	Estimated Underlying Fund Fee <sup>1</sup>	Service Fee <sup>2</sup>	State Administrative Fee <sup>3</sup>		
Growth Portfolio	0.034%	0.12%	0.10%	0.254%	\$30
Moderate Growth Portfolio	0.041%	0.12%	0.10%	0.261%	\$30
Conservative Growth Portfolio	0.040%	0.12%	0.10%	0.260%	\$30
Balanced Portfolio	0.040%	0.12%	0.10%	0.260%	\$30
Income & Growth Portfolio	0.039%	0.12%	0.10%	0.259%	\$30
Income Portfolio	0.055%	0.12%	0.10%	0.275%	\$30
Cash Preservation Portfolio	0.100%	0.12%	0.10%	0.320%	\$30

<sup>1</sup> Estimated Underlying Fund Fees reflect each Underlying Fund's expense ratio disclosed in its most recent prospectus that was available as of June 30, 2023. Expenses for multiple-fund Portfolios represent a weighted average of the expenses of the Portfolio's Underlying Funds. The fees and expenses of the Underlying Funds may change.

<sup>2,5</sup> Vestwell receives the Service Fee and \$25 of the Annual Account Maintenance Fee for the Program Management Services it provides to DreamAhead.

<sup>3,5</sup> The Committee receives the State Administrative Fee and \$5 of the Annual Account Maintenance Fee to help cover the Committee's administrative costs and expense of operating DreamAhead.

<sup>4</sup> This total is assessed against assets over the course of the year and includes the annualized Service Fee, the annualized Underlying Fund Fee, and the annualized State Administrative Fee, but does not include the Annual Account Maintenance Fee. Please refer to the table on page 25 of the program details booklet that shows the total assumed investment cost over 1, 3, 5, and 10-year periods.

# Approximate Cost for a \$10,000 Investment

The following table compares the approximate cost of investing in DreamAhead over different periods of time. These hypotheticals are not intended to predict or project investment performance. Past performance is no guarantee of future results. Your actual cost may be higher or lower. The tables are based on the following assumptions:

- A \$10,000 contribution is invested for the time periods shown.
- A 5% annually compounded rate of return on the amount invested throughout the period.
- The Account balance at the end of the period shown is used to pay for Qualified Expenses (the table does not consider the impact of any potential state or federal taxes on the cost of investing).
- The total annual asset-based fee remains the same for the Static Portfolios as that shown in the Static Portfolios Fee Structure Table. The actual total annual asset-based fee may be higher or lower.
- Each Account is charged the full Annual Account Maintenance Fee of \$30.
- For Portfolios other than the Growth Portfolio and the Cash Preservation Portfolio, a purchase fee of 0.75% is charged in Year 1 on the Vanguard Emerging Markets Government Bond Index Fund component of each Portfolio.

## Static Portfolios

APPROXIMATE COST OF \$10,000 INVESTMENT

Portfolio Option	1 Year	3 Years	5 Years	10 Years
Growth Portfolio	\$56.17	\$172.12	\$293.28	\$622.49
Moderate Growth Portfolio	\$56.84	\$174.23	\$296.95	\$630.69
Conservative Growth Portfolio	\$56.76	\$173.97	\$296.50	\$629.69
Balanced Portfolio	\$56.72	\$173.84	\$296.28	\$629.19
Income & Growth Portfolio	\$56.70	\$173.80	\$296.20	\$629.00
Income Portfolio	\$58.31	\$178.81	\$304.93	\$648.50
Cash Preservation Portfolio	\$62.94	\$193.28	\$330.08	\$704.56

# Underlying Funds

The following profiles highlight the investment objective, strategy, and a summary of the main risks of each of the Underlying Funds in which both the Year of Enrollment and the Static Portfolios invest. The Portfolios in DreamAhead are more likely to meet their goals if each Underlying Fund in which each Portfolio invests achieves its stated investment objectives.

The information provided in this Program Details Booklet and other information in the links below has been prepared by or on behalf of the applicable Underlying Fund by its Investment Manager and has been derived from the applicable Underlying Fund prospectuses. The Program Administrators assume no responsibility for its accuracy or completeness.

## Fidelity Underlying Funds

### Fidelity Total Market Index Fund

**Ticker:** FSKAX

**Website:** <https://fundresearch.fidelity.com/mutual-funds/summary/315911693>

#### Investment Objective

The Fund seeks to provide investment results that correspond to the total return of a broad range of United States stocks.

#### Principal Investment Strategies

This fund normally invests at least 80% of assets in common stocks included in the Dow Jones U.S. Total Stock Market Index, which represents the performance of a broad range of U.S. stocks. The Fund uses statistical sampling techniques based on such factors as capitalization, industry exposures, dividend yield, price/earnings (P/E) ratio, price/book (P/B) ratio, and earnings growth to attempt to replicate the returns of the Dow Jones U.S. Total Stock Market Index using a smaller number of securities. The Fund also lends securities to earn income for the Fund.

#### Principal Investment Risks

This fund is subject to the following risks: Stock Market Volatility Risk; Issuer-Specific Changes Risk; Correlation to Index Risk; Passive Management Risk, and Securities Lending Risk.

## **Fidelity International Index Fund**

**Ticker:** FSPSX

**Website:** <https://fundresearch.fidelity.com/mutual-funds/summary/315911727>

### **Investment Objective**

The Fund seeks to provide investment results that correspond to the total return of foreign stock markets.

### **Principal Investment Strategies**

This fund normally invests at least 80% of assets in common stocks included in the MSCI EAFE Index, which represents the performance of foreign stock markets. The Fund uses statistical sampling techniques based on such factors as capitalization, industry exposures, dividend yield, price/earnings (P/E) ratio, price/book (P/B) ratio, earnings growth, and country weightings to attempt to replicate the returns of the MSCI EAFE Index. The Fund also lends securities to earn income for the Fund.

### **Principal Investment Risks**

This fund is subject to the following risks: Stock Market Volatility Risk; Foreign Exposure Risk; Geographic Exposure to Japan; Issuer-Specific Changes Risk; Correlation to Index Risk; Passive Management Risk; and Securities Lending Risk.

## **Fidelity Emerging Markets Index Fund**

**Ticker:** FPADX

**Website:** <https://fundresearch.fidelity.com/mutual-funds/summary/316146331>

### **Investment Objective**

The Fund seeks to provide investment results that correspond to the total return of emerging stock markets.

### **Principal Investment Strategies**

This fund normally invests at least 80% of assets in securities included in the MSCI Emerging Markets Index and in depository receipts representing securities included in the index. The Fund uses statistical sampling techniques based on such factors as capitalization, industry exposures, dividend yield, price/earnings (P/E) ratio, price/book (P/B) ratio, earnings growth, country weightings, and the effect of foreign taxes to attempt to replicate the returns of the MSCI Emerging Markets Index. The Fund also lends securities to earn income for the Fund.

### **Principal Investment Risks**

This fund is subject to the following risks: Stock Market Volatility Risk; Foreign and Emerging Markets Risk; Geographic Exposure to China, Issuer-Specific Changes Risk; Correlation to Index Risk; and Passive Management Risk; and Securities Lending Risk.

## **Fidelity U.S. Bond Index Fund**

**Ticker:** FXNAX

**Website:** <https://fundresearch.fidelity.com/mutual-funds/summary/316146356>

### **Investment Objective**

The Fund seeks to provide investment results that correspond to the aggregate price and interest performance of the debt securities in the Bloomberg Barclays U.S. Aggregate Bond Index.

### **Principal Investment Strategies**

This fund normally invests at least 80% of the Fund's assets in bonds included in the Bloomberg Barclays U.S. Aggregate Bond Index. The Fund uses statistical sampling techniques based on duration, maturity, interest rate sensitivity, security structure, and credit quality to attempt to replicate the returns of the Bloomberg Barclays U.S. Aggregate Bond Index using a smaller number of securities. The Fund engages in transactions that have a leveraging effect on the Fund, including investments in derivatives - such as swaps (interest rate, total return, and credit default), options, and futures contracts - and forward-settling securities, to adjust the Fund's risk exposure. The Fund invests in Fidelity's central funds (specialized investment vehicles used by Fidelity® funds to invest in particular security types or investment disciplines) consistent with the asset classes discussed above.

### **Principal Investment Risks**

This fund is subject to the following risks: Interest Rate Changes Risk; Foreign Exposure Risk; Prepayment Risk; Issuer-Specific Changes Risk; Correlation to Index Risk; Passive Management Risk; and Leverage Risk.

An investment in the fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Unlike individual debt securities, which typically pay principal at maturity, the value of an investment in the fund will fluctuate. You could lose money by investing in the fund.

## **Fidelity Long-Term Treasury Bond Index Fund**

**Ticker:** FNBGX

**Website:** <https://fundresearch.fidelity.com/mutual-funds/summary/31635V232>

### **Investment Objective**

The Fund seeks a high level of current income.

## Principal Investment Strategies

This fund normally invests at least 80% of assets in securities included in the Bloomberg U.S. Long Treasury Bond Index, a market value-weighted index of investment-grade fixed-rate public obligations of the U.S. Treasury with maturities of 10 years or more. The Fund normally maintains a dollar-weighted average maturity that generally is expected to be 10 years or more, consistent with that of the index. The Fund uses statistical sampling techniques based on duration, maturity, interest rate sensitivity, security structure, and credit quality to attempt to replicate the returns of the Bloomberg U.S. Long Treasury Bond Index using a smaller number of securities.

## Principal Investment Risks

This fund is subject to the following risks: Interest Rate Changes Risk; Prepayment Risk; Issuer-Specific Changes Risk; Correlation to Index Risk; and Passive Management Risk.

# Vanguard Underlying Funds

## Vanguard Emerging Markets Bond Fund Admiral Shares

**Ticker:** VEGBX

**Website:** <https://investor.vanguard.com/investment-products/mutual-funds/profile/vegbx>

## Investment Objective

The Fund seeks to provide total return while generating a moderate level of current income.

## Principal Investment Strategies

The Fund invests in fixed income securities of various maturities, yields, and qualities. Under normal circumstances, the Fund will invest at least 80% of its assets in fixed income securities of issuers that are tied economically to emerging market countries. The Fund seeks to have a majority of its assets denominated in or hedged back to the U.S. dollar but has the ability to invest in bonds denominated in a local currency on an unhedged basis. Emerging market bonds include sovereign debt securities, which include fixed income securities that are issued or guaranteed by foreign governments or their agencies, authorities, political subdivisions or instrumentalities, or other supranational agencies, as well as debt securities issued or guaranteed by foreign corporations and foreign financial institutions. Emerging market countries include countries whose economies or bond markets are less developed, which includes most countries except for Australia, Canada, Japan, New Zealand, the United States, the United Kingdom, and most European Monetary Union countries.

The Fund may invest in emerging market bonds of any maturity or quality. The Fund may invest in bonds that have lower-range quality ratings (including those in default), which are those rated the equivalent of Ba1 or lower by Moody's Investors Service, Inc., or another independent rating agency, or if unrated, are determined to be of comparable quality by the Fund's advisor. These are commonly referred to as "junk bonds."

The Fund is considered nondiversified and may invest a greater portion of its assets in fewer issuers. The Fund may invest a large percentage of its assets in issuers of a single country, a small number of countries, or a geographic region.

Although the Fund may use derivatives for any investment purpose, it expects to use derivatives predominantly to adjust interest rate or currency exposure; to adjust exposure to a particular market, segment of the market, or security; or as a substitute to direct investment.

### **Principal Investment Risks**

The Fund is subject to the following risks, which could affect the Fund's performance, and the level of risk may vary based on market conditions: Country/Regional Risk; Emerging Markets Risk; Currency Risk; Nondiversification Risk; Credit Risk; Liquidity Risk; Derivatives Risk; Interest Rate Risk; Income Risk; Call Risk; and Manager Risk.

### **Vanguard Total Bond Market Index Fund – Institutional Plus Shares**

**Ticker:** VBMPX

**Website:** <https://investor.vanguard.com/investmentproducts/mutual-funds/profile/vbmpx>

### **Investment Objective**

Vanguard Total Bond Market Index Fund seeks to track the performance of a broad, market-weighted bond index.

### **Principal Investment Strategies**

The Fund employs an indexing investment approach designed to track the performance of the Bloomberg U.S. Aggregate Float Adjusted Index. This Index measures the performance of a wide spectrum of public, investment-grade, taxable, fixed income securities in the United States—including government, corporate, and international dollar-denominated bonds, as well as mortgage-backed and asset-backed securities—all with maturities of more than 1 year

The Fund invests by sampling the index, meaning that it holds a broadly diversified collection of securities that, in the aggregate, approximates the full index in terms of key risk factors and other characteristics. All of the Fund's investments will be selected through the sampling process, and at least 80% of the Fund's assets will be invested in bonds held in the index. The Fund seeks to maintain a dollar-weighted average maturity consistent with that of the Index. As of December 31, 2022, the dollar-weighted average maturity of the Index was 9 years. The Fund also seeks to maintain an average duration consistent with that of the Index. As of December 31, 2022, the average duration of the Index was 6 years.

### **Principal Risks**

The Fund is subject to the following risks, which could affect the Fund's performance, and the level of risk may vary based on market conditions: Interest Rate Risk, Income Risk, Prepayment Risk, Extension Risk, Call Risk, Credit Risk, Index Sampling Risk, and Liquidity Risk.

### **Vanguard Cash Reserves Federal Money Market Fund Admiral Shares**

**Ticker:** VMRXX

**Website:** <https://investor.vanguard.com/investment-products/mutual-funds/profile/vmrxx>

### **Investment Objective**

This fund seeks to provide current income while maintaining liquidity and a stable share price of \$1.00.

### **Principal Investment Strategies**

The fund invests primarily in high-quality, short-term money market instruments. Under normal circumstances, at least 80% of the fund's assets are invested in securities issued by the U.S. government and its agencies and instrumentalities, including repurchase agreements that are collateralized solely by U.S. government securities or cash. Although these securities are high-quality, some of the securities held by the fund are neither guaranteed by the U.S. Treasury nor supported by the full faith and credit of the U.S. government. To be considered high quality, a security must be determined by Vanguard to present minimal credit risk based in part on a consideration of maturity, portfolio diversification, portfolio liquidity, and credit quality. The fund invests more than 25% of its assets in securities issued by companies in the financial services industry, which includes, without limitation, securities issued by certain government-sponsored enterprises. The fund maintains a dollar-weighted average maturity of 60 days or less and a dollar-weighted average life of 120 days or less.

Government money market funds are required to invest at least 99.5% of their total assets in cash, U.S. government securities, and/or repurchase agreements that are collateralized solely by U.S. government securities or cash (collectively, government securities). The fund generally invests 100% of its assets in U.S. government securities and therefore will satisfy the 99.5% requirement for designation as a government money market fund.

### **Principal Risks**

The Fund is designed for investors with a low tolerance for risk; however, the Fund is subject to the following risks, which could affect the Fund's performance: Income Risk; Manager Risk; Credit Risk; and Industry Concentration Risk.

## Schwab Total Stock Market Index Fund

**Ticker:** SWTSX

**Website:** <https://www.schwabassetmanagement.com/products/swtsx>

### Investment Objective

The Fund's goal is to track the total return of the entire U.S. stock market, as measured by the Dow Jones U.S. Total Stock Market Index<sup>SM</sup>.

### Principal Investment Strategies

To pursue its goal, the Fund generally invests in stocks that are included in the Dow Jones U.S. Total Stock Market Index. It is the Fund's policy that under normal circumstances it will invest at least 80% of its net assets (including, for this purpose, any borrowings for investment purposes) in these stocks; typically, the actual percentage is considerably higher. The Fund will notify its shareholders at least 60 days before changing this policy.

The Fund generally gives the same weight to a given stock as the index does. However, when the investment adviser believes it is in the best interest of the Fund, such as to avoid purchasing odd-lots (i.e., purchasing less than the usual number of shares traded for a security), for tax considerations, or to address liquidity considerations with respect to a stock, the investment adviser may cause the Fund's weighting of a stock to be more or less than the index's weighting of the stock. The Fund may sell securities that are represented in the index in anticipation of their removal from the index or buy securities that are not yet represented in the index in anticipation of their addition to the index.

The Dow Jones U.S. Total Stock Market Index includes all publicly traded stocks of companies headquartered in the United States for which pricing information is readily available – 4,270 stocks as of December 31, 2022. The index is a float-adjusted market capitalization weighted index that reflects the shares of securities actually available to investors in the marketplace.

Because it may not be possible or practical to purchase all of the stocks included in the index, the investment adviser seeks to track the total return of the index by using sampling techniques. These techniques involve investing in a limited number of index securities which, when taken together, are expected to perform similarly to the index as a whole. These techniques are based on a variety of factors, including capitalization, performance attributes, dividend yield, price/earnings ratio, risk factors, industry factors and other characteristics. The Fund generally expects that its portfolio will include the largest 2,000 to 2,800 U.S. stocks (measured by the float-adjusted market capitalization), and that its industry weightings, dividend yield and price/earnings ratio will be similar to those of the index.

The Fund may invest in derivatives, principally futures contracts, and lend its securities to minimize the gap in performance that naturally exists between any index fund and its corresponding index. This gap occurs mainly because, unlike the index, the Fund incurs expenses and must keep a small portion of its assets in cash for business operations. By using futures, the Fund potentially can offset a portion of the gap attributable to its cash holdings. In addition, any income realized through securities lending may help reduce the portion of the gap attributable to expenses.

The Fund may concentrate its investments (i.e., hold more than 25% of its total assets) in an industry or group of industries to approximately the extent that the index the Fund is designed to track is also so concentrated.

### **Principal Risks**

The Fund is subject to risks, any of which could cause an investor to lose money. The Fund's principal risks include: Market Risk; Equity Risk; Investment Style Risk; Tracking Error Risk; Sampling Index Tracking Risk; Concentration Risk; Market Capitalization Risk; Large-Cap Company Risk; Mid-Cap Company Risk; Small-Cap Company Risk; Derivatives Risk; Liquidity Risk; and Securities Lending Risk.

### **Schwab Treasury Inflation Protected Securities Index Fund**

**Ticker: SWRSX**

**Website:** [https://www.schwabfunds.com/public/csim/home/products/mutual\\_funds/summary.html?symbol=SWRSX](https://www.schwabfunds.com/public/csim/home/products/mutual_funds/summary.html?symbol=SWRSX)

### **Investment Objective**

The Fund's goal is to track as closely as possible, before fees and expenses, the price and yield performance of the Bloomberg Barclays U.S. Treasury Inflation Protected Securities (TIPS) Index (Series-L)SM. The Fund's investment objective is not fundamental and therefore may be changed by the Fund's board of trustees without shareholder approval.

### **Principal Investment Strategies**

To pursue its goal, the Fund generally invests in securities that are included in the index. The index includes all publicly-issued TIPS that have at least one year remaining to maturity, are rated investment grade and have \$250 million or more of outstanding face value. The TIPS in the index must be denominated in U.S. dollars and must be fixed-rate and non-convertible.

It is the Fund's policy that, under normal circumstances, it will invest at least 90% of its net assets (net assets plus borrowings for investment purposes) in securities included in the index.

### **Principal Risks**

- Market Risk; Investment Style Risk; Inflation Protected Security Risk; Interest Rate Risk; Credit Risk; Liquidity Risk; Prepayment and Extension Risk; Sampling Index Tracking Risk; Tracking Error Risk; and Money Market Fund Risk
